25X1A 1. [ ] Comment. In March, 318 tank cars loaded with 6,710 metric tons of gasoline and in April, 327 tank cars with 6,342 metric tons of gasoline were dispatched from the air force fuel depot in Velten, Unit Dadyev. This amount is an increase of 100 and 50 percent over the amount shipped in January and February 1953 respectively. [ ] This increase corresponds to information received on intensified air activity on airfields in East Germany because of fair weather. The consignees mentioned are supply officers at the listed airfields and military posts. Most of the names had been reported previously. 25X1A

25X1A 2. [ ] Comment. For identification of [ ] 25X1C

25X1A 3. [ ] Comment. In March, 110 tank cars loaded with 1,531 metric tons of gasoline and, in April, 115 tank cars loaded with 1,704 metric tons of gasoline were dispatched from the army fuel depot in Velten, Unit Efimov. This calculation does not include the shipment [ ] stationed in Poland which was dispatched via Guben as only the outgoing shipments to units in East Germany were considered. The fuel shipments increased by 85 percent in March and by 100 percent in April over the amount recorded for February 1953. See 25X1C [ ] The increase probably results from a higher consumption of fuel in connection with troop movements for firing exercises in March and the movement to troop training grounds in April.

25X1A 4. [ ] Comment. These shipments consisted of used oil for regeneration. 25X1A
